

# ACHIEVE

*What's New in Microsoft Dynamics NAV 5.0?*

Microsoft Dynamics NAV 5.0

Microsoft Dynamics NAV

# ACCELERATE

*Move forward, faster*

Microsoft Dynamics™ NAV is the latest release of a business management solution that already supports more than 50,000 customers and one million users around the globe. By choosing to upgrade, you can build on existing IT investments, realize productivity gains, and make fast, confident decisions—with minimal disruption to your operations and at a low total cost of ownership.

## *Achieve more for your business with Microsoft Dynamics NAV 5.0*

Discover a new level of success with innovative enhancements to an award-winning business management solution. Microsoft Dynamics NAV 5.0 empowers people across your organization to:

- Increase efficiency with software that works like and with other Microsoft products.
- Maximize the value of existing IT investments with rich Microsoft integration.
- Fuel productivity with enhanced features and functionality.
- Gain the focused business insight that enables confident decision-making.

**For more information about Microsoft Dynamics NAV, visit [www.microsoft.com/dynamics/nav](http://www.microsoft.com/dynamics/nav).**

## *Equip people to work faster and smarter*

Enable your people to make the most productive use of their time and skills. Microsoft Dynamics NAV 5.0 works like and with other Microsoft software, such as the Microsoft® Office system, to minimize training costs and accelerate productivity from the start. People can get more done with fewer clicks across all levels of your organization, from repurchasing stock to producing reports and building customer communications to sharing information with colleagues.

### **Bridge productivity gaps with deep Microsoft Office system integration**

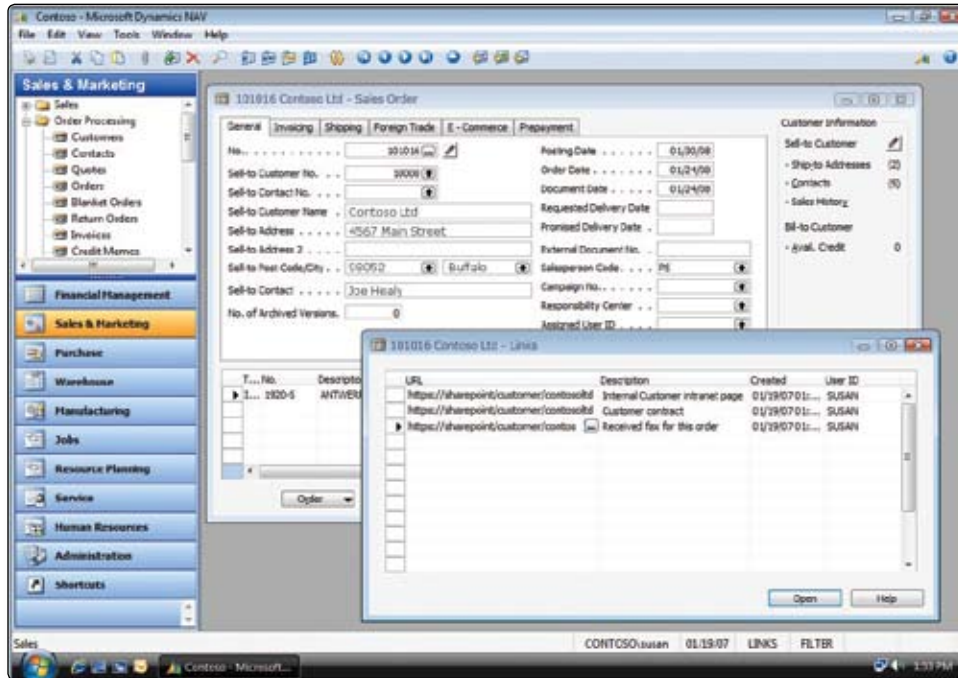

Microsoft Dynamics NAV 5.0 offers tight Microsoft Office system integration that connects people with the information they need, the way they want it. People can:

- Work productively with familiar tools—such as Microsoft Office Word, Microsoft Office Outlook®, Microsoft Office Excel®, and Microsoft Windows® SharePoint® Services—to gain a complete view of customers, tasks, and activities.
- Access, analyze, and share information in familiar formats.
- Take action quickly based on integrated information that updates automatically across systems.
- Link Microsoft Dynamics NAV records to relevant documents such as reports and spreadsheets.

### **Work offline with enhanced Outlook synchronization**

People who work with Outlook offline or on the road can update the system quickly by specifying which information they want to synchronize—including information from customized Outlook forms. Whether they've captured a new account or simply need to record a contact, you can rest assured that your business system reflects the most current, accurate information.

*Deliver ease of use that meets individual needs*

To bridge the gap between structured and unstructured data, you can link any external document to Microsoft Dynamics NAV records.

### **Expand your business reach**

Microsoft Dynamics NAV 5.0 provides efficient integrations and data exchange, and optimal database performance. Commerce Gateway and Employee Portal make it easy to customize your solution for specific industry or business requirements, and to readily share data across applications and with remote users and supply chain partners.

### **Maximize IT investment value across your business**

Help achieve a fast return on investment with a solution that integrates smoothly with other Microsoft products and technologies you may already use, including Microsoft Windows Server® 2003, Microsoft Windows Small Business Server 2003, Microsoft SQL Server™ 2005, Windows SharePoint Services, Microsoft Office SharePoint Server, Microsoft BizTalk® Server, and Windows Live™ Local Search.

### **Fuel confident decisions**

Tight integration with Microsoft products and new technologies provides real-time access to the data people need for in-depth analysis, effective collaboration, and faster, more confident decisions. People across your organization can:

- Take advantage of rich query and analysis capabilities with SQL Server 2005.
- Build and share specialized reports in formats most relevant to their role in your organization with SQL Server Reporting Services.
- Choose the data “dimensions” they want, and build customized “cubes” for analysis with Business Analytics in Microsoft Dynamics NAV.

## *Enhance speed and productivity*

Microsoft Dynamics NAV 5.0 offers enhanced features and functionality that help you further streamline business operations and contribute to a low cost of ownership. These include:

### **Supply Chain and Inventory Management**

- Automated approval routing for sales and purchasing documents
- Expanded jobs budgeting, tracking, and management
- Improved service order management, including service item tracking
- Improved inventory costing
- Enhanced item lot or serial number tracking and traceability

### **Business Intelligence**

- Installs a business intelligence environment on SQL Server 2005 and can take advantage of SQL Analysis and Reporting Services.
- Ability to select data dimensions and create customized data "cubes" for analysis
- Greater capabilities for creating and sharing reports

### **Financial Management**

- Prepayment invoicing, posting, and tracking
- Greater flexibility in setting up account schedules and financial statements
- Intercompany postings for distributing purchase costs
- More options for exporting data, including easier exporting to Excel

### **Overall Efficiency**

- Improvements to the Customer/Server Integrated Development Environment (C/SIDE®) integrated development environment
- Improved online Help
- Links in Microsoft Dynamics NAV records to relevant documents, such as reports and Excel spreadsheets

### **Look to the future with confidence**

Microsoft Dynamics NAV is designed to work with new and emerging Microsoft applications and technologies, including the 2007 Microsoft Office system and Windows Vista™ operating system (planned for the 5.1 release).

**With Microsoft Dynamics NAV, you can take your business smoothly into the future.**

*Gain the freedom to focus on what is most important for your business success*
